Release Notes - Streamflow - Version 1.28

Improvement

[SF-8] – Changed case overview behaviour

[SF-10] – Cleared note input section and added input note to list below and to list at sidebar.

[SF-12] – New case ('+') button visible / actionable in detailed views.

[SF-14] – Export of filled in case fields only.

Bug

[SF-5] – Fixed checkbox choices at case PDF export that did not work

[SF-4] – Fixed PDF export on swing client at Linux that did not work

[SF-4] – Fixed wrong dependency path on swing client.

[SF-4] – Fixed missing dependencies in pom file.

New Feature

[SF-6] – Added "add | remove" case label from selected case type.

[SF-7] – Made it possible to move across the form during fill in, without saving data. Fixed validation of data so that only validated and correct data is inserted.

[SF-9] – Made it possible to open the form for edit in a new tab.

[SF-11] – Made it possible to delegate a case to a specific user in the drop-down menu.

[SF-13] – Warning window will show on case delete action.

[SF-14] – Made it possible to add background to PDF templates. Made it possible to add other page elements (header, footer with logo) to PDF template.

Comments to the Release Notes

[SF-14] – Made it possible to add background to PDF template. Made it possible to add other page elements (header, footer with logo) to PDF template.

Background: This feature uses an overlay mechanism based on the comparison of color. The darker the color, the higher up it will be. E g a black background will lay over a light-blue font.

[SF-11] – Made it possible to delegate a case to a specific user in the drop-down menu.

Background: The function is available only if the case is not yet assigned. If the function is not available, it will show up in the drop-down menu only after an unassign has been done.

Upgrading from version 1.22 / 1.21 / 1.20

To upgrade / install, see the instructions on the wiki, document:

"Installation_av_Streamflow_i_GlassFish_20140730.pdf"

The upgrade requires no data migration.

Upgrading from versions earlier than 1.20
